

How to Exchange your old VAG Dash Prog for the New VAG Prog

Cost: 695USD(include shipping cost)

Functions

The new tool will have the same functions as your old VAG Dash Prog, but if you need more options that are not included on your old tool, you will have to pay for these options. Check the price list on our website or contact your dealer for more details.

What to do with your old tool

Disable your old VAG Dash Prog by using Inter_link to take a firmware update. We will then upload a new firmware update to our server to allow the same functions on your new VAG Prog; you then take a firmware update for your new VAG Prog using PC_link. Send back the old tool to your dealer (you only need send the machine, hold all other cables for use with your new tool), if your old tool is damaged and you cannot do a firmware update then you must send back your old tool first, we will then send the new tool to you.

Important Note: You have two weeks from activation of your new tool to return of your old VAG Dash Prog; if we do not receive it within this time we will disable your new VAG Prog until the old VAG Dash Prog is returned

Warranty

The new tool carries a 3 years warranty for tools hardware, and a 1 years warranty for cables and accessories, but please note you are responsible for any shipping costs incurred.
